## **SHORTS CONTENTS of the enclosed issue of OVERLEVEN DOOR WERELDRECHT = SURVIVAL BY WORLD LAW OF MARCH OF 2013**

**Page 1.** “World federalism, even if that utopia were realizable, could possibly make an end to international wars, but what about civil wars?” To that we answer that world federalism is not a panacea making it all good and beautiful on earth. However, it seems logical to admit that democratic world institutions would dispose of better means to tackle civil wars as well. Besides, and above all, local hostilities would no longer endanger world peace. In the current international jungle of superpowers and other countries utterly armed against each other, a conflict like that in Syria risks to inflame the whole planet : we cannot avoid envisaging that possibility.

**Page 2 & 3** - We received a report from the International Registry of World Citizens about the year 2011. On a world scale, about nine hundred new persons had themselves registered as world citizens in that year. The expenses amounted to 6,976.12 euro, the revenues to 6,879.03. Besides the international registry is still disposing of several possessions worth several thousands of euro : as a local contact address, we can only dream of such richness! Registered world citizens can ask for the full report to Registre des Citoyens du Monde/Registry of World Citizens, 66, boulevard Vincent Auriol, 75013 Paris, [monde@recim.org](mailto:monde@recim.org) of [dan.cdm@recim.org](mailto:dan.cdm@recim.org) . There also more information can be obtained about the institutions that came out mainly of the ranks of registered world citizens : the Peoples’ Congress, the Consultative Assembly to the Peoples’ Congress, World Solidarity Against Hunger, the Institute of *Mundialist* Studies.

- Lea Provo-Eggermont passed fifteen years ago already. In the sixties she initiated and coordinated many non-violent peace actions. Later on she worked in India on building non-violent working and living communities that are flourishing still. Ask for more information to : Sevapur SAWES v.z.w., p/a Mieke Van der Auwera, Vlasakker 12, B- 2120 Wommelgem, [www.sevapur.be](http://www.sevapur.be) , e-mail : [mieke.vanderauwera@telenet.be](mailto:mieke.vanderauwera@telenet.be) .

- Prof. Gene Sharp (born in 1928), a worldwide known researcher about non-violent action, obtained the “Alternative Nobel Price” yearly granted by the Right Livelihood Award Foundation. When as a young man he was imprisoned for conscientious objection, Albert Einstein sympathised with him. Years later Sharp founded the Albert Einstein Institution. Einstein, as one will remember, at least before the invasion of Nazi-Germany in many European countries, favoured the idea of conscientious objection. After the war, he stressed the necessity of a world government, in order to save humanity from nuclear holocaust.

**Page 4** – Peter Vereecke, previous mayor of Evergem in Belgium, since several years opposes horrifying developments in our societies. In that framework he drew the attention of public opinion to the phenomenon of so called chemtrails : the latter are caused by lots of aeroplanes that several times a

week spray materials into the atmosphere, e.g. heavy metals like aluminium, barium and strontium, as well as many chemical products. Behind this officially inexistent fact there may be intentions of geo-engineering and even of mind manipulation. Metals like aluminium severely damage health. Ask for more information to the Belfort Group, c/o Peter Vereecke, Hooiwege 20, B-9940 Evergem, [peter.vereecke56@gmail.com](mailto:peter.vereecke56@gmail.com) .

**Page 5 & 6** – Mojmir Babacek, coordinator of the Citizens' Association for the Ban of the Manipulation of the Human Nervous System by Radiofrequency Radiation, wrote the following letter to J.M. Barroso, Chairman of the European Commission.

Those who want to co-sign this text can still do so and send their subscription to **Mojmir Babacek, Na Hazce 258, 511 01 Turnov (Czech ia), [mbabacek@iol.cz](mailto:mbabacek@iol.cz)**

Dear Mr. Barroso

The report by European parliament's STOA (Science and Technology Options Assessment) on „Crowd control technologies“ states: “In October 1999 NATO announced a new policy on non-lethal weapons and their place in allied arsenals” (pg. xlv); and “In 1996 non-lethal tools identified by the U.S. Army included... directed energy systems” and “radio frequency weapons” [http://www.europarl.europa.eu/stoa/cms/home/publications/studies?year=all&q=crowd+control+technologies&studies\\_search=Odeslat+dotaz](http://www.europarl.europa.eu/stoa/cms/home/publications/studies?year=all&q=crowd+control+technologies&studies_search=Odeslat+dotaz) (at the bottom of the page, second reference pg. Xlvi). Directed energy system is further defined by the STOA document: „Directed energy weapon system designed to match radio frequency source to interfere with human brain activity at synapse level“ ([http://www.europarl.europa.eu/stoa/cms/home/publications/studies?year=all&q=crowd+control+technologies&studies\\_search=Odeslat+dotaz](http://www.europarl.europa.eu/stoa/cms/home/publications/studies?year=all&q=crowd+control+technologies&studies_search=Odeslat+dotaz) at the bottom of the page, first reference, Appendix 6-67 – for more information see [http://mojmir.webuda.com/Means\\_of\\_Information\\_War\\_Threaten\\_Democracy\\_And\\_Mankind](http://mojmir.webuda.com/Means_of_Information_War_Threaten_Democracy_And_Mankind)).

In the European Union numbers of citizens complaining of being attacked by mind control weapons are rising (below are e-mail addresses of some of those) and they find no solution, help, protection, investigatory bodies, health tests or measures able to protect them from so-difficult-to-prove attacks, which leaves them in total defenselessness. It is obvious that the use of such means for manipulation of human beings is in sharp contrast with the basic legislation of democratic countries guaranteeing their citizens the right to personal freedom. Then it is hard to understand why there is, in contrast to Russia, in the member countries of the European Union no law prohibiting the possession of means enabling remote manipulation of human nervous system and their use against people by organizations and individuals as well as by government agencies and institutions including provisions establishing teams equipped with technologies capable to detect those detrimental radiations and their sources.

According to the bill proposed by Dennis J. Kucinich in the U.S. congress the means capable to manipulate human nervous system include "land-based, sea-based or space-based systems using radiation, electromagnetic, psychotronic, sonic, laser or other energies directed at individual persons or targeted populations for the purpose of information war, mood management or mind control of such persons or populations" <http://thomas.loc.gov/cgi-bin/query/r?c107:chemtrails> . As well, the Russian defense minister, Anatoly Serdyukov, told Vladimir Putin in March of this year: “The development of weaponry based on new physics principles; direct-energy weapons, geophysical weapons, wave-energy weapons, genetic weapons, psychotronic weapons, etc., is part of the state arms procurement program for 2011-2020” [http://en.ria.ru/military\\_news/20120322/172332421.html](http://en.ria.ru/military_news/20120322/172332421.html).

Evidently there is more than one technology which can be used to remotely manipulate human nervous system. Therefore we ask you to recommend the member states of the European Union to enact legislations which would protect their citizens against direct energy, electromagnetic, psychotronic, sonic or laser radiations, which can be used to manipulate their nervous system and consequently their bodily functions, their thoughts

and their behaviour. In our opinion the teams capable to detect detrimental radiations should be supervised by either ombudsmans or some human rights commissions with participation of representatives of Amnesty International or Human Rights Watch, which should guarantee that no state will use those technologies against its citizens.

As well we would highly appreciate if the European Union would promote, on the international forum, the international ban of the development and use of those technologies as it was stated in the Resolution on the environment, security and foreign policy of the European parliament in 1999 [http://www.europarl.europa.eu/pv2/pv2?PRG=DOCPV&APP=PV2&DATE=280199&D\\_ATEF=990128&TPV=DEF&TYPEF=A4&POS=1&SDOCTA=8&TXTLST=1&Type\\_Doc=RESOL&PrgPrev=TYPEF@A4%7CPRG@QUERY%7CAPP@PV2%7CFILE@BIBLIO99%7CNUMERO@5%7CYEAR@99%7CPLAGE@1&LANGUE=EN](http://www.europarl.europa.eu/pv2/pv2?PRG=DOCPV&APP=PV2&DATE=280199&D_ATEF=990128&TPV=DEF&TYPEF=A4&POS=1&SDOCTA=8&TXTLST=1&Type_Doc=RESOL&PrgPrev=TYPEF@A4%7CPRG@QUERY%7CAPP@PV2%7CFILE@BIBLIO99%7CNUMERO@5%7CYEAR@99%7CPLAGE@1&LANGUE=EN). So far we are not aware that this is actually happening. The lack of legislation in the member states of the European Union raises, as well, suspicion that this intent is not being fulfilled.

Pages 7 & 8 - Europe is in crisis, we are told. But what's "Europe"? In our view it existed as something like an entity of civilisation for more than a millennium. In the twentieth century, however, it has become unclear what characterises our continent. This has remained so even after the creation of the so called European Union. This being said, however, if we are concerned about the menace of a totalitarian "eurocracy", we don't feel opposed to the idea of close collaboration between our countries. Above all, we would like them to form a building stone in a democratic world federation of the future : the survival problems of our time, indeed, are posed on the scale of the planet.

#### Pages 9 till 12 – **Flashes**

-We are not so called *one worlders* who want to create what they call the New World Order. Their aim is to dominate the whole planet by whatsoever means. We on the contrary are in favour of the realization of democratic world institutions in order to deliver mankind of the scourge of arms races, wars and other catastrophes.

-Synthetic biology, alias biological weaponry, according to a documentary on ARTE constitutes the greatest danger for the survival of humanity. This might be true, even if in the eighties, at the time of the protests against the placing of Cruise and Pershing missiles in Europe as well as against e.g. chemical weapons, this horror was more or less forgotten. This certainly had also to do with manipulations by the "peace forces" in the Eastern bloc : whilst at the time the Soviet Union was producing biological weapons full speed, those forces kept silent about it.

-Ruth Gill wrote an article about the declaration of Putin and his minister of defence about radiation weapons. After having produced them for decades, the Russian government suddenly declared that they will be part of the armaments program in the following years. We don't now why they broke silence about them, but what they said leaves no doubt as to the existence of this weaponry.

-According to <http://home.gund.de/>, almost unobserved by the public, the National Security Agency is building a big spy and surveillance centre in Utah. It would be able to register all telephone conversations and all use of the internet. In the opinion a previous collaborator of the said agency we are less than a step away from a totalitarian state.

-Thousands of persons around the world claim to be electronically terrorized. One of them, the engineer Waldemar Lotz, a *Russlanddeutscher*, a German Russian, had to experience that when he worked in the hydrometeorological institute of Astrakan. He fled to Germany, became a German citizen, but the horrifying harassment has gone on.

-Dr. Rauni-Leena Luukanen-Kilde, previous chief medical adviser to the Finnish Minister of Health, wrote several books and incessantly reports to the world that immense crimes against humanity are being perpetrated secretly by means of anti-personal radiation weapons. She reminds us that already Norbert Wiener, in his book "Cybernetics"(1948), had written about the dangers for our fundamental rights and freedoms inherent to cybernetic developments. Yoneji Mautsda, the "father of the

information society, also claimed that our freedoms could end in Orwellian slavery without the general public even being aware of it.

-In 2004 Michigan adopted a law against electronic terrorism. Those who practise it can be punished to life long imprisonment in the worst case. This may be called excellent that far. However, we have not heard up till now that persons or groups had been condemned. We fear that the military and civil secret services, besides criminal groups working with them, can continue their practices without being persecuted by the judiciary.

-On the 26<sup>th</sup> of January, the *Assemblée des Citoyens du Monde*, the French section of the Consultative Assembly to the Peoples' Congress, organised a study day. Among other things human rights in China and the inefficiency of the UNO in its present form were discussed.
